## Yahiro Station Walking Guide

The Keisei Line connects directly with the Toei Asakusa Subway Line, offering convenient access across the region.

Trains bound for Chiba run directly to Narita International Airport, while those heading into central Tokyo stop at major areas such as Tokyo Skytree (Oshiage), Asakusabashi, Ginza, and Shinagawa. Continuing further south, the line even provides direct access to Haneda Airport, without any transfers.

Within the city center, the train operates as a subway, while in the suburbs, it runs above ground.

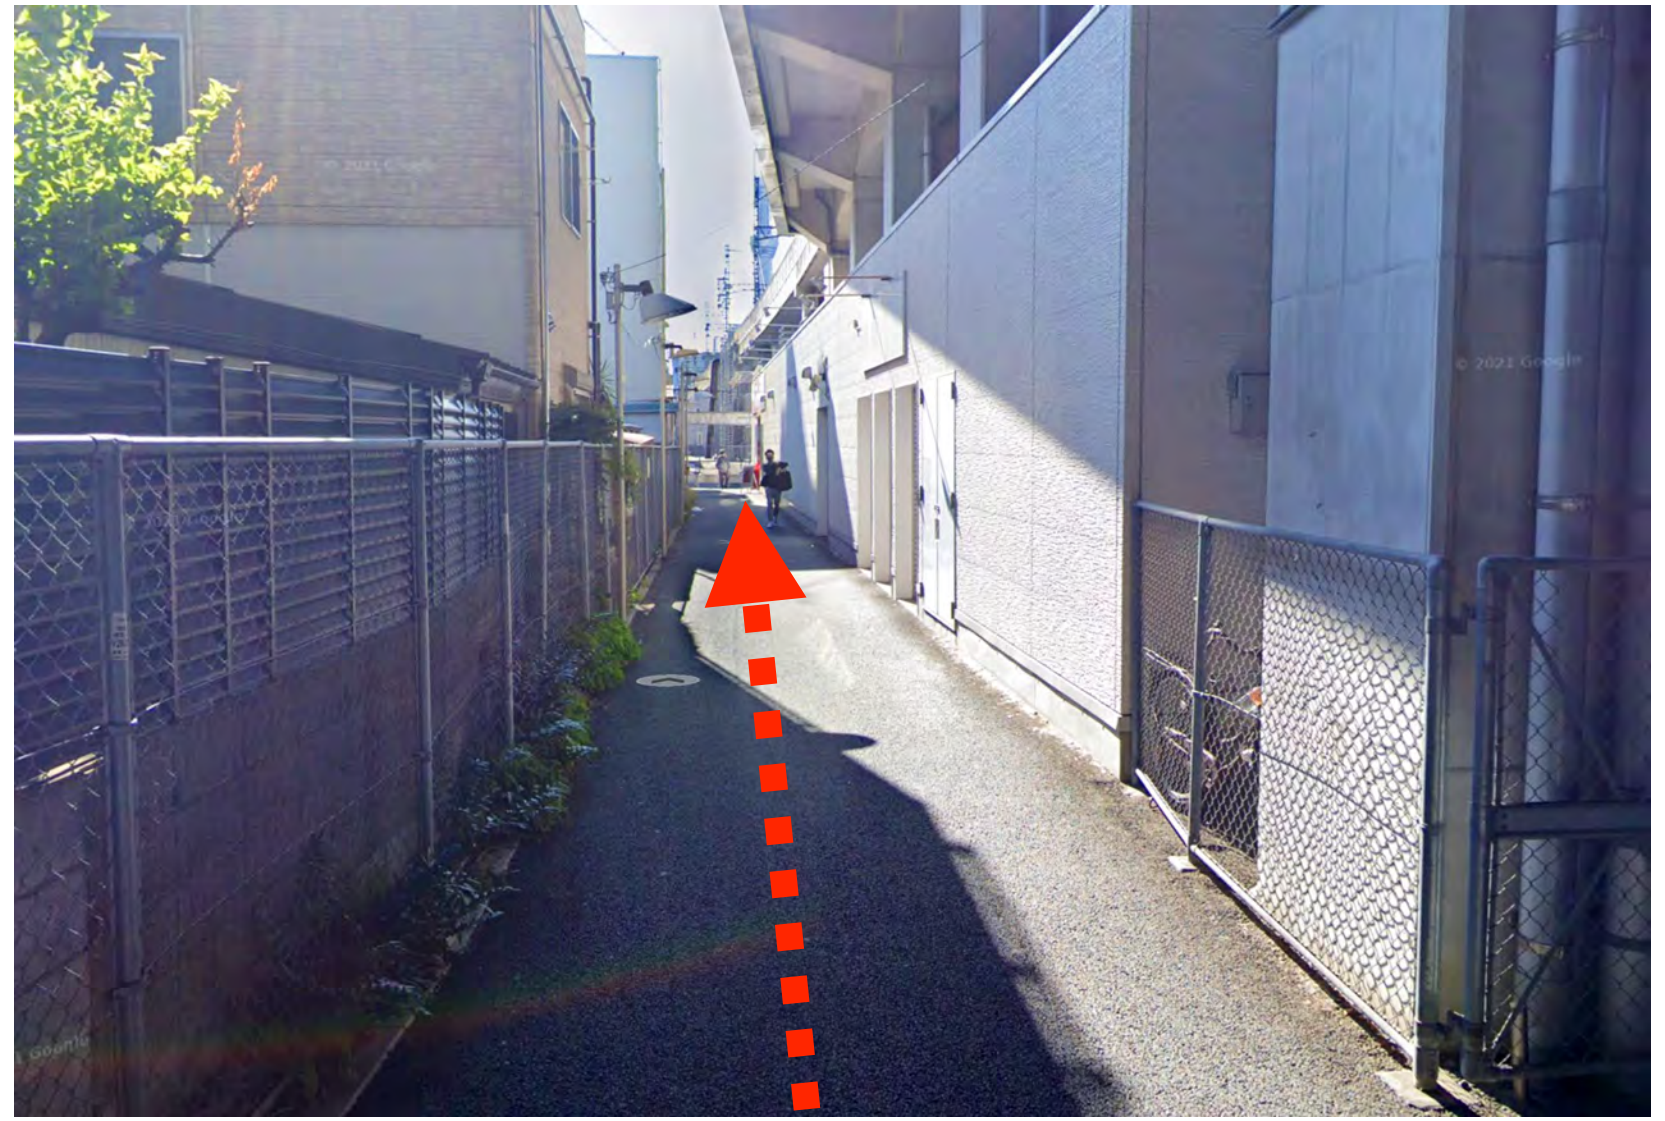

Most trains are through-services with the subway, allowing for seamless travel without transfers. However, service patterns may vary depending on the time of day, so checking the schedule in advance is recommended.
